Re: **Florida State Ruby Diamond Auditorium**
Tallahassee, Florida

Dear Gary:

I would like to take this opportunity to commend Ingram Enterprises, Inc. on the Drywall, Metal Framing & Plaster systems installed at FSU's Ruby Diamond Auditorium. RDA is now a state of the art performance hall which continues to receive accolades from the music community at large. FSU and the entire design and construction team are extremely proud of the final product. A case in point RDA has now been renamed Ruby Diamond Concert Hall.

The transformation from a university lecture facility to notable performance hall was not an easy one. The technical requirements for acoustics and theater ruled the day on the construction of Ruby Diamond. Ingram Enterprises is no stranger to the myriad of acoustical details necessary for the success of an acoustical space. Your overall cooperation and attention to detail on this project was greatly appreciated. Your on-site team displayed the highest degree of professionalism in the execution of their work. The team effort you put forth proved to be very beneficial to the successful completion of the project in a timely manner.

Thank you for being an integral part of the construction team. Gilchrist, Ross, Crowe Architects look forward to working with you on future projects.

Sincerely,
Gilchrist, Ross, Crowe Architects

Connor Ross, AIA, LEED AP
Principal
